

DARWIN

THE VOYAGE THAT SHOOK THE WORLD

Review by Pastor Peter Rahme

2009 marked the 200th anniversary of Charles Darwin's birth and 150 years since the publication of his 'On the Origin of Species'. In response to the Darwin celebrations, Creation Ministries International (CMI), produced a major international 52-min high-definition 'docu-movie' costing over \$1m.

Structured around Darwin's famous HMS Beagle voyage, **THE VOYAGE THAT SHOOK THE WORLD** exposes the true story of Darwin and presents his humanistic, anti-Christian views though with dignity and respect, but also reveals the flaws, confusion and falsehoods of his theories.

Featuring stunning wildlife photography, period re-enactments and interviews with leading authorities from around the world, '**DARWIN - The Voyage That Shook The World**' subtly contrasts the theory of evolution with the truth of creation and effectively compares the zoology of human reasoning with the theology of Divine Revelation

A great feature of this unique DVD resource is that it comes with the following 23 subtitles: *Afrikaans, Albanian, Arabic, Chinese (simplified), Chinese (traditional), Czech, Danish, English (for hearing-impaired), Finnish, French, German, Hungarian, Indonesian, Italian, Japanese, Norwegian, Polish, Portuguese, Romanian, Russian, Spanish, Swedish and Vietnamese.* .
